Knights for Road Safety (KROS) is an Erasmus+ programme (KA2 - Cooperation for Innovation and the Exchange of Good Practices : Strategic Partnerships for school education), focusing on open education and innovative practices in a digital era, aiming to strengthen the profiles of teaching profession. KROS is funded by Erasmus+ Programme of the European Union.

# KROS

Knights for Road Safety

[www.kros-project.eu](http://www.kros-project.eu)

## THE PROJECT

The aim of the KROS project is to bring a change on how road safety programs and initiatives are implemented in schools across Europe, by strengthening the profiles of the teaching profession on road safety issues. In this framework a strategic partnership of Road Safety Experts, Pedagogues and Curriculum Developers, Local Authorities, Advanced Educational Applications Developers and Schools are joining forces to design, develop and validate an innovative professional development program for teachers.

## OBJECTIVES

- To improve teachers' awareness on road safety issues
- To improve teachers' professional skills on road safety principles and best practices integration into lessons
- To develop a network of pilot schools which will act as living labs of the KROS approach
- To develop a Road Safety Academy

## AN OPEN SCHOOLING APPROACH

KROS suggests a **project-based multidisciplinary approach** that requires extended **collaboration and networking** between schools and local communities.

## 100 SCHOOLS

A network of 100 pilot schools will act as living labs of the KROS approach.

## AN INNOVATIVE ONLINE EDUCATIONAL PLATFORM

KROS will introduce cutting edge technologies in order to accompany the retention of information regarding the subject of road safety. The project will use **new technologies** including online 3D resources or virtual reality (VR) so as to introduce attractiveness in the learning process and to improve the quality of the delivery channels of the content. The KROS educational platform will include extended presentation of case studies and examples of good practice on how teachers could efficiently implement Road Safety content in their everyday teaching.

## TEACHERS TRAINING ACTIVITIES

Trainings for teachers, school heads and experts in **Austria** and **Spain** are planned throughout the life of the project as well as at **national level**.

## BECOME A KROS AGENT!

Are you interested to improve your knowledge on Traffic Safety Education, learn and inspire your students in order to develop educational projects that are proposing solutions to road safety problems?

*Visit  
[www.kros-project.eu](http://www.kros-project.eu)  
and fill in the online  
application form!*

By joining the network of pilot schools you are having the opportunity to:

- Get free access in the innovative online educational platform
- Get free training on the use of the educational resources
- Connect with other schools across Europe, exchange knowledge and good practices
- Use the VR simulator equipment at your school! (optional)
- Get recognition on your projects and inspire other teachers and students across Europe!
- Become a certified "KROS" agent!
